SABA RAMZAN

DevOps & Cloud Engineer

+92-307-2722265 | Karachi, Pakistan | sabaramzan0226@gmail.com | Portfolio | LinkedIn | GitHub

SUMMARY

Junior DevOps Engineer with 1 year of hands-on experience building CI/CD pipelines (GitHub Actions, Jenkins), managing containerized deployments (Docker, Kubernetes, Node.js applications), and provisioning cloud infrastructure on AWS with Terraform. Skilled in monitoring, troubleshooting production issues, and applying Infrastructure-as-Code and cloud security best practices.

TECHNICAL SKILLS

CI/CD & Containers: GitHub Actions, Jenkins (Pipelines), GitOps, Docker, Kubernetes (EKS, Minikube), Helm
Application Deployment: Node.js (NestJS), Python (Django), containerized web application deployment
Cloud Platforms: AWS (EC2, EKS, ECS, ECR, S3, RDS, VPC, IAM, ALB, CloudFormation, NAT Gateway)
Infrastructure as Code: Terraform, AWS CloudFormation
Monitoring & Observability: Prometheus, Grafana, AWS CloudWatch (metrics, alarms, dashboards)
Scripting & Languages: Python, Bash, Shell Scripting
Networking & Security: TCP/IP, DNS, HTTP/HTTPS, VPC Networking, Subnetting, NAT, Load Balancing, Security Groups, IAM least-privilege, secrets management, OSI Model
Databases & Caching: AWS RDS (PostgreSQL/MySQL), DynamoDB
Tools & OS: Git, GitHub, Linux (primary), Windows (familiar)

EXPERIENCE

DevOps Intern (Remote) — Progree **Jun 2026 – July 2026**
Rawalpindi, Pakistan (Remote)

- Authored multi-stage Dockerfiles for a multi-dependency web application stack, minimizing final image size and securely configuring environment variables and container port routing.
- Built and maintained automated CI/CD pipelines in GitHub Actions triggered on remote pushes, including code checkout, static linting, unit test execution, and deployment status logging.

PROJECTS

ECS Microservices E-Commerce Deployment **Github**
AWS ECS Fargate · Terraform · GitHub Actions · ECR · RDS · API Gateway

- Provisioned a full AWS stack via Terraform (ECS Fargate, ECR, VPC, RDS, API Gateway) across 7 microservices with 4 GitHub Actions CI/CD workflows and a zero-hardcoded-credentials security model.

CI/CD Pipeline for NestJS Application with Jenkins **Github**
Jenkins · Docker · NestJS · GitHub · Email Notifications

- Built a Jenkins pipeline automating build, Docker image load, container deployment, and email notifications for a NestJS application, streamlining deployment from source pull to live release.

Python Django App on Kubernetes (Minikube) **Github**
Docker · Kubernetes · Django · Helm · kubectl · Prometheus · Grafana

- Containerized a Django application with Docker and deployed it via Kubernetes manifests (Deployment, Service, ConfigMap, Ingress, Secrets) on Minikube, with Prometheus and Grafana monitoring integrated through Helm.

EDUCATION

Bachelor of Science in Computer Science — Salim Habib University **2023 – 2027**
Karachi, Pakistan

- 100% Merit-Based Scholarship | Dean's Honor List (x4) | Vice Chancellor's Honor List (x2)
- **Relevant Coursework**: DevOps, Cloud Computing, Computer Networks, Operating Systems, Software Engineering, Database Management, AI, Full Stack Development

CERTIFICATIONS

- AWS Basics — KodeKloud Certificate
- Docker for Absolute Beginners — KodeKloud Certificate
- Linux for Absolute Beginners — KodeKloud Certificate
